

COVID-19 Vaccine Coding Guidance

The American Medical Association’s website provides a resource designed to help determine the appropriate CPT code combination for the type and dose of vaccine that you are using. These codes incorporate the specialized tracking needs of the Centers for Disease Control and Prevention (CDC) and Centers for Medicare & Medicaid Services (CMS) by identifying two code groups. One group identifies a specific vaccine product and the other provides a vaccine administration code that is both vaccine and dose specific (1st dose vs. 2nd dose). A CVX code identifies the vaccine product. For COVID-19 vaccines:

- **207:** Moderna vaccine CVX code
- **208:** Pfizer-Biontech vaccine CVX code
- No CVX code is currently available for the AstraZeneca vaccine.
