

FQHC/Clinic Office Hours – February 19, 2021

Announcements:

- State office hours on Fridays at 9am; recommending clinics/FQHCs attend
- Everyone should have received Pfizer vaccine, but due to weather delays Moderna doses have not been shipped; shipping date still TBD but hopeful for early next week
 - Next week doses will be doubled due to delay in this week's shipment then fixed allocations will go back to normal
 - LADPH sending guidance on how to manage for doses that won't be used due to weather impact causing double doses for next week
- Starting February 16, all Pfizer dose should be reported as 6 dose vials (previously 5 per vial)
- Friday FQHC sessions will be discontinued but will continue to meet Tuesdays at noon
- Next eligible sectors in Phase 1B will be opening March 1; additional guidance coming soon
- Providers need to fill out survey by COB today- <https://www.surveymonkey.com/r/TDFKYX6>

Allocations & Shipment:

- Q: When will Moderna vaccine be shipped due to weather delays?
 - A: Hoping they should be shipped early next week.
- Q: Do you know if we should expect to get double of our regular dose next week or the regular weekly dose?
 - A: Yes, you should expect to get double doses next week. Once Moderna is shipped from this week, you will get your allotment from weeks of 2/15 and 2/22
- Q: Should clinics postpone all appointments for this week while we wait for vaccines to arrive next week?
 - A: Yes. As soon as clinics get confirmation of shipment, they should send vaccine projections to LADPH.

Systems:

- Q: Any update on when MyTurn is going take over PrepMod?
 - A: LADPH anticipated state would be doing the onboarding. However, it was announced this week that LADPH will be responsible for this. Providers should hear more in the next week on next steps for onboarding onto MyTurn
- Q: Should clinics opt out of MyTurn if they can report vaccines administered via EHR or CAIR2?
 - A: Clinics should still enroll in MyTurn because it remains unknown what the TPA will decide regarding reporting requirements.
- Q: Is the CAIR2 EHR interface the same as the CAIR2 Mass Vax Tool EHR interface?
 - A: Answer unknown
- Q: Is their additional data that gets submitted to the state through MyTurn that is not submitted through the CAIR?
 - A: Yes, persons experiencing homelessness, race and ethnicity status, and a handful of additional fields in PrepMod and MyTurn that are not in CAIR. There is still a flat file (excel document) with the missing fields that needs to be completed by health centers that submit data only through CAIR. Excel document emailed to Aisha.

- Q: On a vaccine call yesterday the HRSA clinics mentioned that they opened up a chart for each vaccine patient. Do other clinics on this call now do the same?
 - A: Yes, clinics are doing this. Some health centers on NextGen are setting up a "shadow clinics" to open up charts for non-patients and staff, but there are extra licensing fees attached to that.
 - CCALAC guidance is here: <https://ccalac.org/wordpress/wp-content/uploads/StaffNon-Patient-COVID-19-Vaccination-Tracking-Guidance-1.29.21.pdf> (VAMs is outdated, please ignore)

- Q: Will this affect clinics' UDS measures?
 - A: This is a concern for clinics. There are ways to count appropriately when you register non-patients into your EMR and it won't affect your UDS numbers. Reminded clinics to look into creating a "shadow clinic" in NextGen and about the resource on our CCALAC COVID resource site with more guidance on this.
