

TELEHEALTH ACCESS

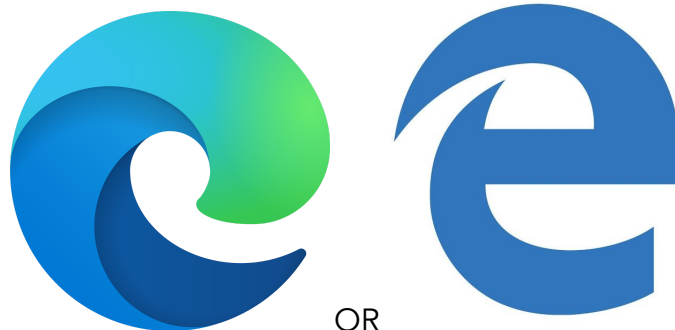

FOR SENIORS

If you have trouble with this, feel free to email contact@telehealthforseniors.org or text 475-675-0564 to set up a tech support call!

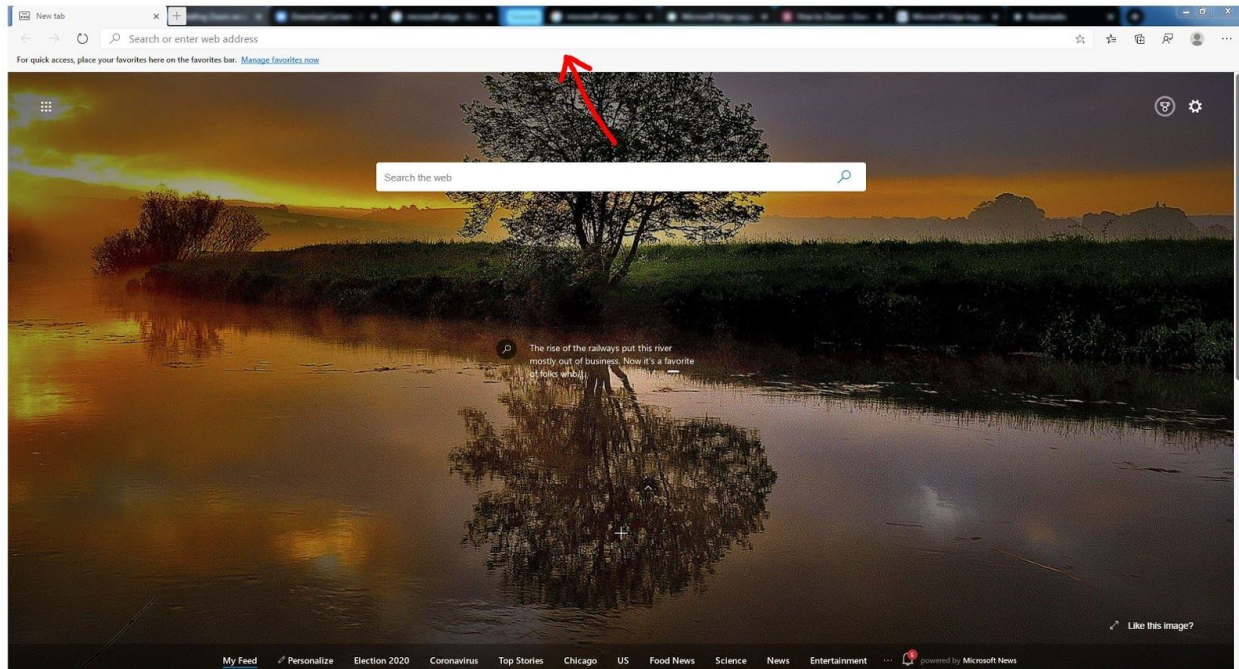

On the computer you want to use Zoom on:

1. Click on the Microsoft Edge icon, it will most likely be located on the bottom (but may be located on the left or right) side of your display. It will look like this:

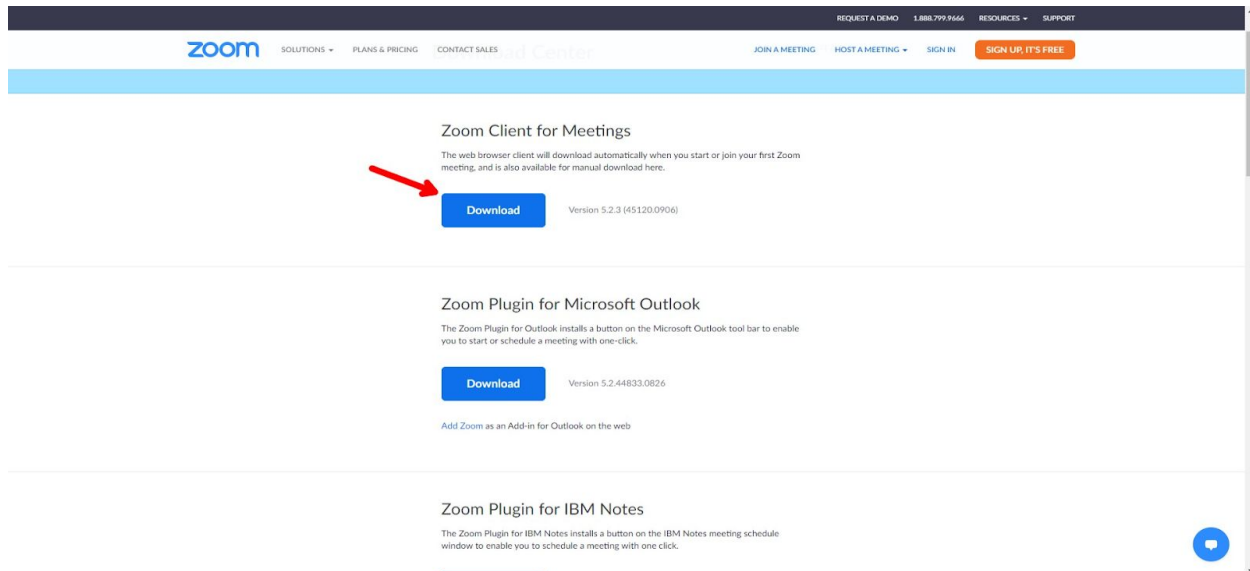

OR

2. Type <https://zoom.us/download> into the bar at the top of the new box that pops up:

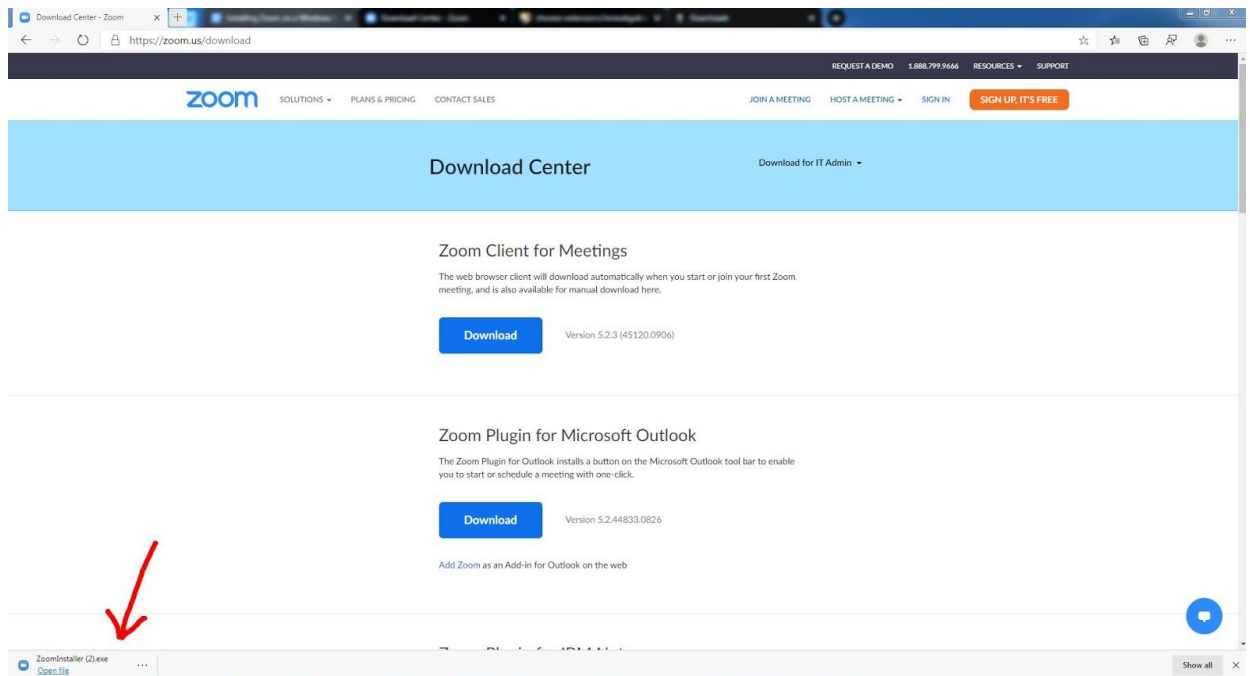

(Note: Other parts of the box may be different than the image shown)

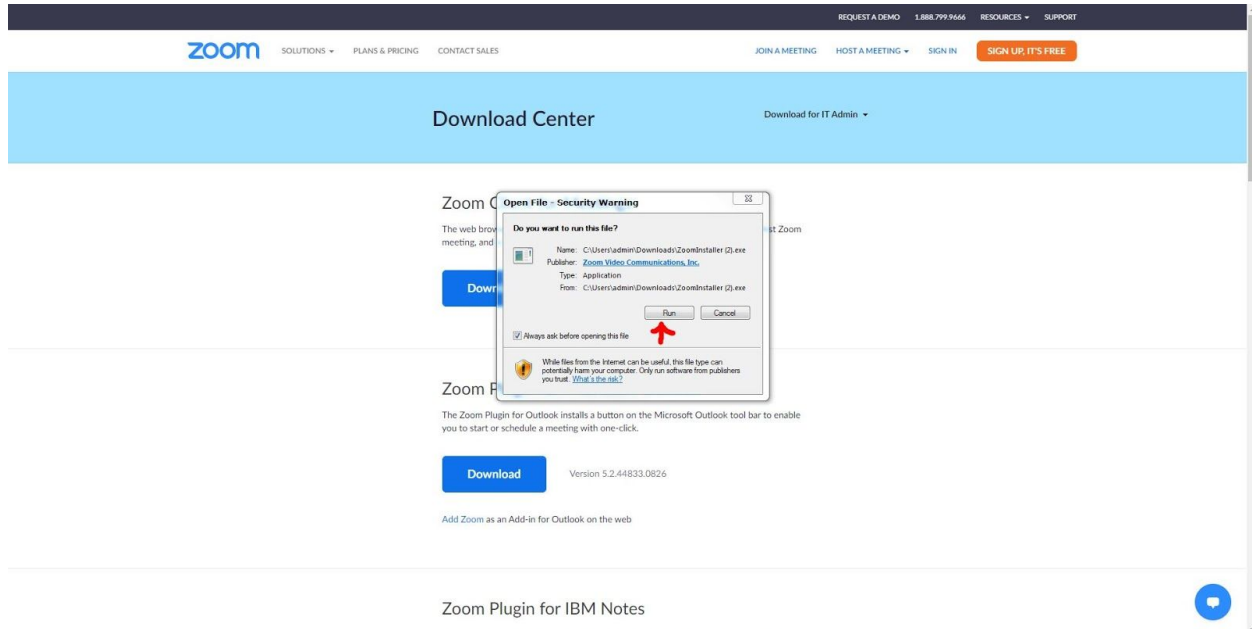

3. Click on the blue download button under "Zoom Client for Meetings"

4. A bar will appear at the bottom of the screen, with a small rectangle in it, click on the rectangle.

5. Another box may appear that looks similar to the one in the image below, do not be alarmed, this is normal. If it does, click run.

6. A progress bar will be shown, and when it finishes, you will be shown a box that looks like the image below, click the X in the top right corner. The next time you want to join a Zoom meeting (by clicking on a blue link) it will open Zoom, you did it!
