

Now Offering Virtual Visits

Virtual visits are just like office visits, but allow you to visit your provider via video from the comfort of your home. All you need is a web enabled device with a working camera and microphone.

Ask for a virtual visit when scheduling your appointment.

Virtual visits help you:

Reduce spread of COVID-19

Receive care at home. Protect your health and reduce your exposure to the coronavirus.

Take less time off work

See your provider during a break, or before/after work.

Skip the waiting room

Avoid the wasted time and contagion of a waiting room.

Stay in touch

Meet your provider more often and better manage your health.

Reduce unnecessary travel

Virtual visits allow you to save time and money on travel.

Use virtual visits for:

- Concerns about coronavirus symptoms
- Appointment follow-ups
- Symptom screening
- Medication review/refills
- Managing chronic health conditions
- Behavioral health sessions

There are many uses for virtual visits. Talk with your practice today to see how virtual visits can meet your needs.

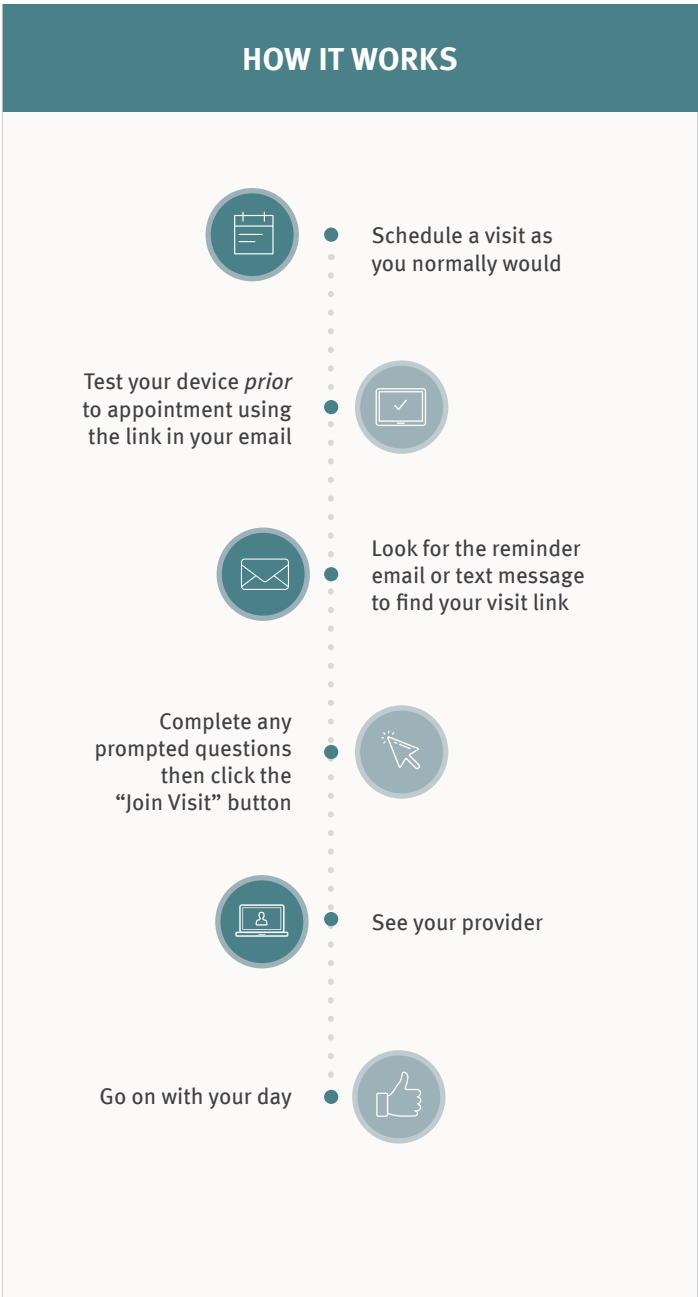

Once scheduled, you will receive an email from noreply@ottohealth.com, or text message, with the visit link to join. There's no app to download or password to remember.

With just one click, you can now see your provider anytime, anywhere.

Works with these devices:

- Computer/laptop: Safari, Firefox, Google Chrome
- iPhone/iPad: Safari
- Android/tablet: Google Chrome

Communicate by video with your doctor using this telehealth platform from OTTO Health, a NextGen Healthcare solution.

Contact your healthcare provider for more information.
