

POSITION NAME:	DEPARTMENT-COST CENTER:
PHYSICAN	ADULT MEDICINE
REPLACEMENT:	REPORTING TO:
FLSA:	LOCATION:
REG FTE	WHC

Watts Health Center is seeking a **Primary Care Physician** for our Los Angeles clinic. Our mission is to provide superior primary care medical service, while forging a life-long bond with our members along with our vision of becoming a leading provider in primary care by improving the health, wellness, and quality of life of the communities we serve, while reducing health care costs.

RESPONSIBILITIES:

- Adheres to policy, procedures, and contractual agreement of the Watts Health Center and Watts Health Foundation, Inc.
- Acts as the official medical representative for Foundation with other contracted facilities to ensure adherence to prescribed medical practice and procedures.
- Reviews and acts upon diagnostic test results as appropriate; ensures patients are aware of test results; documents acknowledgement of results and actions taken in patients' record.
- Adheres to template structure and maximizes the use of available visits to address clinic and patient needs.
- Communicates patient care priorities, especially follow-up plans that involve non-providers (e.g., high-risk patients that need Care Manager follow-up).
- Fosters a collaborative culture and effective teamwork.
- Supports the development and implementation of new clinical initiatives.

REQUIREMENTS:

- 3 years' experience in one or more of the following: medical practice, teaching or investigative medicine.
- Minimum of one (1) year administrative and supervisory experience required.
- Working knowledge of direct patient care methods and practices in a community clinic setting.
- Experience in managed care or value-based care preferred.
-

EDUCATION:

- MD or DO degree, with current licensure in the State of California

LICENSE/CERTIFICATION:

- California State Physician and Surgeon's License and certification in a medical specialty.
- Board certification or eligible required.
-

COVID-19 CONSIDERATIONS:

All patients are subjected to COVID screening and are required to wear a mask when not receiving treatment. All staff members must be fully vaccinated.
